## Federal Supply Schedule 19, Part I

### Marine Craft and Equipment, Inboard/Outboard Engines, Towable Bladders, Floating Barriers, and Buoys

Environmentally-friendly boats made from recyclable materials!

First there was wood; then there was fiberglass. Now, Logic™ introduces the next evolution of boat building with sport and utility boats molded of tough polyethylene plastic. This durable material won't crack, chip, peel, or rot. Its color is molded all the way through (like solid surface countertops). It's completely recyclable. It has five times the impact strength of fiberglass, absorbs both sound and shock, and stands up to accidental abuse. Logic™ boats are low maintenance with state-of-the-art construction, offering a gentle, quiet ride. They are reasonably priced - starting at \$1,286, and come with a life-time limited warranty.

Order directly from the contractor:

Logic Marine Corporation  
100 Golden Drive  
Durham, NC 27705  
Contact: Robert Anderson

# Schedule 19, Part I

## Marine Craft and Equipment, Inboard/Outboard Engines, Towable Bladders, Floating Barriers, and Buoys

### Water Bags Testing System

Water Weights, Inc., offers a unique product and service for all forms of load testing. The Water Weights system allows for a safe, practical, and economical use of water as a weight, in place of steel or concrete for load testing lifting equipment (cranes, lifeboats, davits, elevators, and ramps). The water bags weigh only 1.5% of its rated load when empty and rolled, which means savings in both labor and transportation. All equipment meets government certification requirements for load testing.

Order directly from the contractor:

Water Weights, Inc.  
5139 Brooks Street, Suite E  
Montclair, CA 91763  
Phone: 909-626-8316

## Schedule 84, Part VI, Section A Law Enforcement and Security Equipment Portable Breath Alcohol Analyzer

Lifeloc Technologies, Inc., manufacturer of breath alcohol testing devices for the workplace and law enforcement, introduces a revolutionary new evidential breathalyzer test: the Phoenix Portable Breath Analyzer. The Department of Transportation and the National Highway Traffic Safety Administration have approved the Phoenix as an evidential tester.

The Phoenix quickly and accurately calculates a subject's breath alcohol concentration, using either direct or passive testing. It automatically records vital information, such as the time/date and the last calibration and verification information, and allows entry of a unique subject identification number.

This new product utilizes Total Response Characterization, a revolutionary fuel cell measurement technology that allows for increased accuracy, repeatability, and recovery under any condition.

Order directly from the contractor:

Lifeloc Technologies, Inc.  
12441 W. 49th Avenue, Unit 4  
Wheat Ridge, CO 80033  
Phone: 303-431-9500

## Federal Supply Schedule 68, Part I, Section A De-Icers and Water Conditioners

### Recycled Antifreeze

The Environmental Protection Agency has listed 36 items on the "Comprehensive Procurement Guidelines" (CPG) program... and Recycled Antifreeze (Engine Coolant) is one of the 36 items. Recycled engine coolant is considered "environmentally preferable" under Executive Order No. 13101, "Greening Government through Waste Prevention Recycling and Federal Acquisition."

Recycling Fluid Technologies, Inc., offers this recycled product in a premixed (50% concentration) and precharged (SCA's added) formula in 55-gallon drums. This recycled antifreeze product is designed for use in both automotive and heavy-duty diesel applications. This product meets ASTM 4656 and ASTM 6210.

Order directly from the contractor:

# Schedule 78, Part I, Section C Park and Outdoor Recreational Equipment

## Personal Hydration System Maintenance System

PEK Products offers users of any personal hydration system a complete and easy-to-use maintenance system. Without proper cleaning, harmful bacteria will invade any liquid hydration drinking system, making the water taste bad and smell awful. The Pek Products Total Maintenance Kit allows the user to easily maintain their liquid hydration drinking system in perfect, healthy order. The kit comes complete with a tasteless, quick-rinse anti-bacterial and anti-fungal cleaning solution, easy-to use hose and reservoir brushes, and a convenient drying rack.

### Hydra Hang Liquid Reservoir Aerator: 11353

GSA Price: \$4.25

Stainless steel drying rack hangs reservoir in draining position. Works with all reservoirs.

### Total Maintenance Kit: 11360

GSA Price: \$17.45

Hydra Hang, tube brush, reservoir brush, and 2 oz bottle of anti-microbial hydra cleanser.

### Anti-Microbial Cleanser: 11365

GSA Price: \$49.00

A unique water/vegetable-based "all natural" anti-microbial cleaner. Anti-bacterial and anti-fungal. Free of petroleum, alcohol, and lanolin products. Quickly rinses with no foaming. Does not leave an aftertaste or soap film in reservoir. HypoAllergenic. Box of 12, 2-oz. bottles.

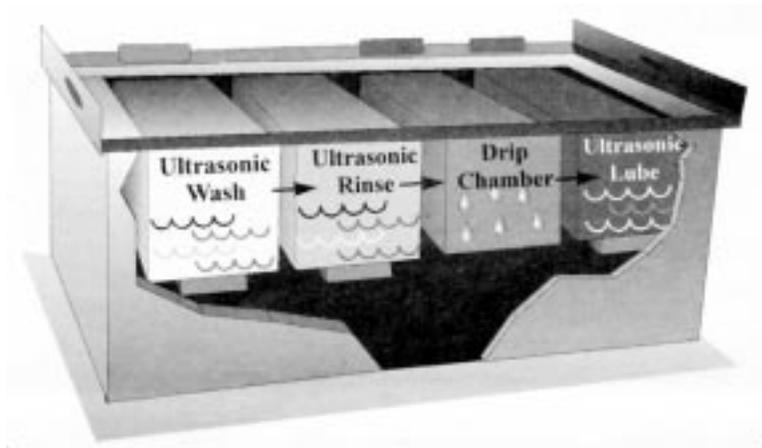

Order directly from the contractor:

PEK Products  
8139 Center St.  
La Mesa, Ca. 91942  
Contact: Phil Kirk

**Schedule 84 VIA**  
**Law Enforcement and Security Equipment**  
**Firearm Cleaning and Lubrication System from**  
**Police Products Corporation**

The Crest ultrasonic firearm cleaning and lubrication system is supplied with all accessories, non-hazardous chemicals, and instructions required to clean and lubricate firearms. Available in ten sizes - which will accommodate and enhance any large or small firearm maintenance operation.

Using water-based detergents and heat, these systems are many times more efficient and safer than cleaning by hand. Unburned powder, carbon, lint, oil, and dirt will be quickly removed from the field-stripped gun parts, usually within 3 to 5 minutes of immersion. Heated ultrasonic cleaning, followed by rinsing and ultrasonic lubrication with supplied lube pan, insures that the parts are moisture-free and protected. After excess lubricant is removed from the parts, they can be lubricated in accordance with manufacturer's instructions.

Ultrasonic transducers mounted to the tank bottom produce high frequency sound waves, which cause rapidly alternating high and low-pressure conditions in the cleaning solution. Millions of microscopic bubbles form and then implode (a process called cavitation), resulting in an intense scrubbing action that removes fouling even in the smallest indentations and grooves that are impossible to reach by hand areas. The parts are then restored to factory-new level of cleanliness, which could not be achieved by the usual hand-cleaning methods.

Order directly from the contractor:

Police Products Corporation  
540 Ravine Court  
Wyckoff, NJ 07482  
Phone: 201-447-2900
